Proloquo2Go	A must have app that provides you with a full-		
	featured augmentative & alternative communication		
	solution for autistic children who have difficulty		
	speaking.		
Grace	Gracefully help autistic children & other special		
	needs children communicate effectively by building		
	sentences from relevant images to form sentences.		
iCommunicate	If your child is suffering from autism or visual		
for iPad	challenges then this app is for you. It allows you to		
	create pictures, flashcards, storyboards, routines,		
	visual schedules and record custom audio in any		
	language.		
First Then Visual	The app allows you to create visual schedules that		
Schedule	provide positive behavior support through the use of		
	images that show daily events (morning routine or		
	therapy schedule) or steps needed to complete any		
	specific activity.		
	People with autism have trouble interpreting		
AutismExpress	emotions and understanding what different facial		
	expressions may represent. It is perfect app to create personalized social stories		
	using photos, text, and audio messages for autistic		
stories2learn	kids having communication difficulties who need		
Storieszicum	support with excursions, routings, or transitions. In		
	order to create stories just arrange the pictures in a		
	sentence. Yet another useful app for your iPhone, iPod touch		
	and iPad that enables people with communication		
MyTalk Mobile	difficulties to express their needs and desires to		
	those around them through a variety of images,		
	pictures, symbols and audio files including human voice		
	It makes communication fun, like another "game" on		
TapToTalk	this cool device. Just tap a picture and TapToTalk		
ταρτυταίκ	speaks. Each picture can lead to another screen of		
	pictures.
